Education

Sep 2025 – Jun 2026	HEC Paris – <i>MSc International Finance</i> 3.8/4.0 GPA	Paris, France
	- Energy Markets (top of class), Electricity Markets, Energy Commodities Trading & Hedging. - Thesis: “Viability of Commodity Futures as Hedging Solutions for Utility Debt”.	
Sep 2021 – Jun 2024	University College London – <i>BSc Physics</i> Upper-Second	London, UK
	Thesis: “Feasibility of Repurposing EV Batteries for Power Storage in Sub-Saharan Africa”.	

Professional Experience

Jul 2026 – Sep 2026	Castleton Commodities International – <i>Power Summer Analyst</i> <i>Joining Full-Time July 27”</i>	London, UK
	- Lifted Sharpe 33% on a 4h Dutch battery vs legacy model, forecasting TenneT regulation states with a 15-min semi-Markov model to optimise pricing and sizing of aFRR voluntary bids. - Reduced stack model bias by 2 €/MWh for Netherlands price forecasts by adapting unstructured EEX ad-hoc tickers into a safe time series, strengthening the desk’s visibility on constraint shifts. - Conducted research on El Niño using historical weather years to generate a set of trade ideas focusing on Germany-France stack asymmetry, presented to traders across carbon, gas and power.	
Aug 2024 – Aug 2025	Crédit Agricole CIB – <i>Corporate Structuring Off-Cycle Analyst</i> <i>Return offer received</i>	London, UK
	- Enabled a hedging mandate for a leading Finnish TSO (plus 15 pitches) by building a regulatory WACC Monte Carlo model with market-pricing, scaled across UK and European regimes. - Presented own regulatory analysis to an Italian utility (SGI) CFO alongside the team’s VP. - Contributed to a Structuring/DCM pitch on balance-sheet robustness under curve shifts, delivering 20+ year fixed/floating and Brent/TTF sensitivities across seven Oil & Gas majors. - Supported the continuous hedging policy of a major Canadian midstream operator, producing and maintaining swaption volatility analytics with the New York Sales & Structuring teams.	
Jun 2024 – Jul 2024	PetroIneos – <i>Power Desk Data Summer Analyst</i> <i>No conversions available</i>	London, UK
	Cut weekly research time by two hours per analyst on the Power Trading desk by building a retrieval-augmented tool centralising internal and external views in one interactive LLM chat.	
Jun 2023 – Aug 2023	Aon – <i>Capital Modelling Summer Analyst</i> <i>Return offer received</i>	London, UK
	- Advised clients on catastrophe bonds for diversification based on cross-asset correlations. - Enhanced stochastic capital models by embedding climate risks in liaison with three teams.	

Other Experience

Sep 2022 – Present	Independent Educator	Remote
	- Built a 2,000+ hour tutoring practice in Maths, Physics and Economics to undergraduate level. - Lecture at the “Children for a Better World” conferences on AI in education for IB students.	
Apr 2026 – May 2026	VINCI Airports – <i>Student Consultant</i>	Paris, France
	- Selected to advise leadership on decarbonisation objectives, modelling solar, battery storage and PPA structures across Portuguese airports. - Built a three-statement model and stress-tested PPA amortisation structures on the balance sheet, presenting IFRS 9 hedge accounting implications to the division CFO.	

Personal Projects

Sep 2025 – Mar 2026	EU Power Market Data & Forecasting Pipeline	Remote
	Built a Python/DuckDB pipeline ingesting ENTSO-E day-ahead prices, load and generation across EU bidding zones, with a monitoring dashboard and ARIMA/VAR/XGBoost forecasts.	
Sep 2025 – Mar 2026	Power Options Pricer & Spark Spread Risk Engine	Remote
	Implemented a Black-76/Monte Carlo pricer with antithetic/control variates and pathwise Greeks, plus an Euler-Maruyama spark spread simulator with GARCH volatility.
